# Korea at a glance

South Korea’s meteoric rise to become one of the leading Asian economies and its rapid progression into the top group of the World’s developed nations tends to be a well-kept secret only known to those who have experienced the drive and energy of this small country at first hand.

National Flag ‘Taegyeukgi’

With a stable and fully democratic political governance, quadrennial elections for the National Assembly and 5 year terms for the President (Broadly the same as the US system) the current government is led by President Moon Jae-in.

The Country is divided into 9 Provinces each with its own Provincial Government. Central and all Provincial Government annual expenditure is **US\$422 billion**. Commercial law is based on the North American system. Contracts are entered into and honoured to the letter. IP rights are recognised and upheld by the courts. Banking is well structured but errs towards low risk with high equity cover. Property is subject to financial speculation but the market has avoided the excessive “boom bust” cycles seen in other developed economies.

# World Rankings (2018)

International Monetary Fund/World Bank	GDP (nominal)	11 out of 194
World Bank	Ease of doing Business	4 out of 190
World Economic Forum Global	Competitiveness	15 out of 140
Heritage Foundation/ Wall Street Journal	Index of Economic Freedom	29 out of 186
United Nations Development program	Human Development Index	22 out of 189
The State of LTE – 4G LTE penetration		1 out of 89

\* Korea is first 5G service country of the world.

# Economic Dash Board (Resources: Statistics Korea)

GDP 2018:	US\$ 1.66 trillion (world rank 11 <sup>th</sup> , IMF)
GDP Growth 2018:	2.7%
GDP Growth Forecast 2019:	2.1%
Per capita income 2018:	<b>US\$ 30,600</b> (world rank 30 <sup>rd</sup> )
Unemployment rate 2018:	3.8 %
Population 2018:	<b>51.8 million</b> (world rank 28 <sup>rd</sup> )
Land Area:	100,210 km <sup>2</sup>
Water area:	440,000 km <sup>2</sup>
Coastline:	12,907 km
Number of Islands within South Korean Waters:	<b>3,358</b>

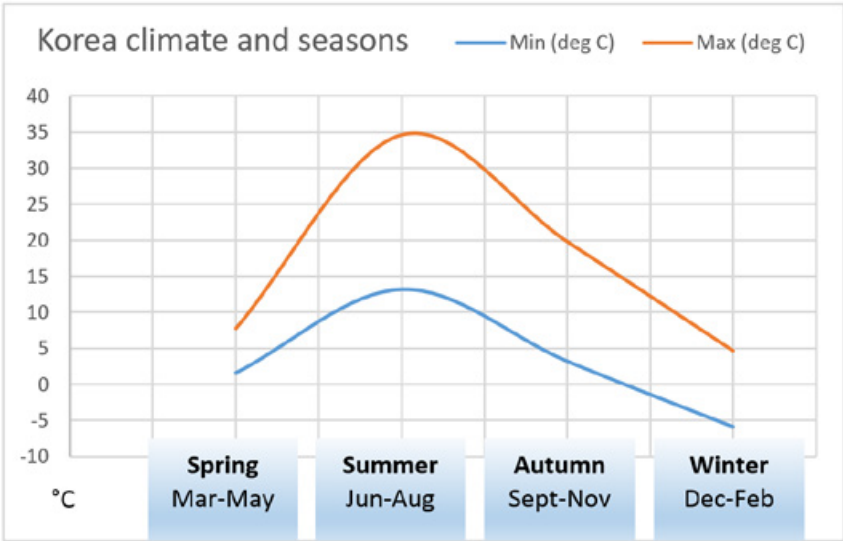

# Weather Seasons & Climate

Climate: Northern Temperate Zone

Seasons: A short and mild spring leads to the hot summer months with July being the rainy season. This is followed by a crisp and usually dry autumn before what can be a harsh winter.

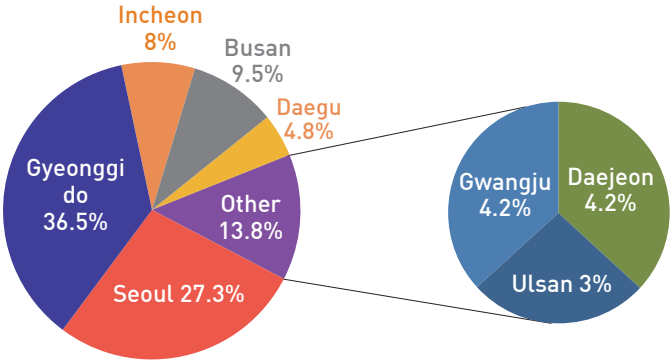

Timezone : GMT + 9hrs

# Population Centres

Gyeonggi do	13.1mil
Seoul	9.8
Busan	3.4
Incheon	2.9
Daegu	2.5
Gwangju	1.5
Daejeon	1.5
Ulsan	1.2

# Industrial Profile

- World 7<sup>th</sup> largest exporter – Value of exports US\$ 601 billion
- World No. 1 ship building by value and completion
- World No. 2 mobile phone producer – 295 million units (Samsung Electronics)
- World No. 2 semi-conductor revenue by a single company (Samsung Electronics)
- World No. 3 in semi-conductor & transistor production
- World No. 7 production of vehicle components and all vehicle types
- World No. 7 production of cars
- World No. 3 Ranking for E-Government readiness
- World No. 5 Industrial Expenditure on R&D (2018)- US\$ 73 billion

# Recreational Boating Statistics & Market Development

The Government supported plan to develop a recreational boating culture has created the fastest growing boating activity in Asia. Since 2009 when the coastal regions were opened for recreational activity the unprecedented numbers of people actively involved in going boating and the annual increases confirm that this is a sustained and fast moving market that has fully embraced “messaging about in boats”

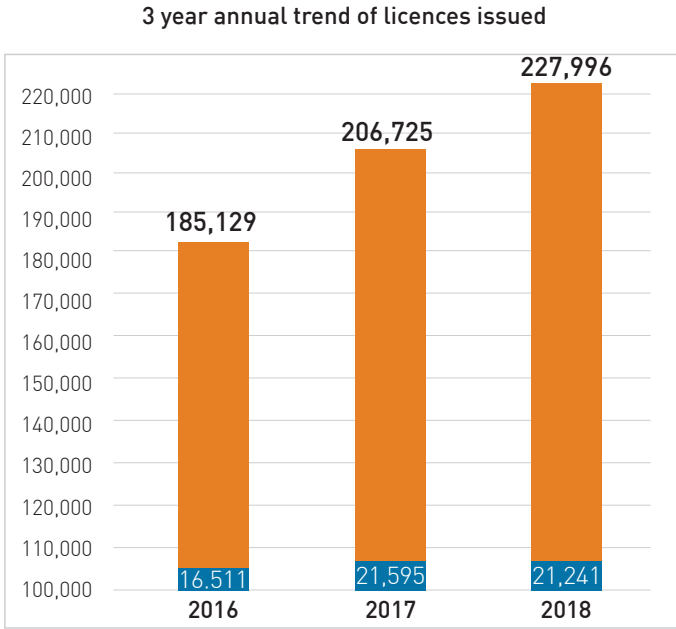

# Boat Users

Leisure Boat Driving Licenses - Required by law for all boats over 3m in length and 5hp.

Total issued to date 227,966 – Controlled by Police, written test and boat driving.

Licenses issued over Last 3 years:-

2018 – 21,241  
 2017 – 21,595  
 2016 – 16,511  
 (Data Source from Korea Coast Guard)

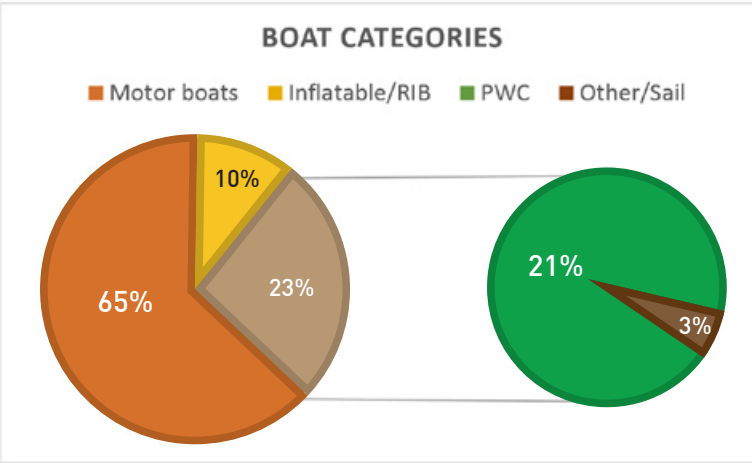

# Registered Leisure Boats

Total Registered 2018 - **27,515**  
 controlled by Korea Coastguard with standard for construction and safety.

New in 2018 – **3,134**  
 New in 2017 – **3,465**

Broken down into 4 main categories:-

Motor Boat **17,963**  
 Inflatable/RIB **2,868**  
 PWC **5,914**  
 Other / Sail **770** (registration for Sail only since late 2011)

The large disparity between driving licences issued and registration of leisure boats can be attributed to respect for the Police and controls applied by them to this system compared to the current lack of resources of the Coastguard. It is safe to assume that the number of boats currently in use is probably more than double the number registered.

Market Conditions - The Opportunity

South Korea is an open market with no import restrictions. There are FTA arrangements with zero import duty for the USA, the EU and 52 Countries. Other countries attract 10%. Recreational Boats manufactured to current international recognized standards are accepted. In practice, import of leisure boats is easy, fast and without bureaucratic intervention.

These low barriers to market entry made it hard initially for domestic boat builders to compete with the quality and proven track record of imported products from established markets. Notwithstanding, following considerable government assistance, local boat building is now rapidly developing with a growing number of high quality, purpose built boats available showing modern and innovative features. Safety and Government imposed quality standards for after sales service technicians are now top of the agenda to support the very rapid domestic market growth. In 2018, in response to anticipated legislation, certified training for engine repair and service technicians now followed by boat repair training has commenced by a new Government recognized organisation, EduMarine.

Korean manufacturers of specialized high tech equipment with well researched and executed business plans are quickly establishing a presence in the international market place.

Boats for commercial use must meet the stringent Korean Ship Building regulations.

Most new imported boats are distributed by manufacturer appointed dealers. There is a strong and growing demand for used boats facilitated by Korean specialised boat brokers who provide a bespoke service to ensure that the buyer gets the right boat. Professionalism is growing with increasing emphasis on quality and pre and after sales customer service.

Korea is a very sophisticated consumer market with buyers expecting top quality products at competitive prices. Unlike China, Koreans prefer not to display their wealth so are more conservative in their buying choices. Brands and brand values are recognized and highly valued. Currently the highest level of boat purchases are in the outboard powered, sport fishing under 10m category but there is growing interest in larger "Cruiser" motor boats and the rapid expansion of coastal berthing in the new marinas have created a cruising corridor from the centre of Seoul down the West Coast - it will not be long before buyers move towards 50ft and over.

Ara Marina - Gimpo, Gyeonggi do

Seoul Marina, Seoul

Jeongok Marina - Hwaseong Gyeonggi do

The National Marina Development Plan - status 2018

A central Government sponsored plan launched in 2010 for the development of 39 marinas. Subsequently amended in 2017 the plan now covers 39 developments to be completed by 2020

So far 32 new marinas have been completed, 7 are developing or under construction.

### The New Hub of Boating Activity

Jeongok Port in Hwaseong City has changed from a small fishing harbour into a modern 250 berth marina with dry storage ashore for a further 400 Boats and a growing café culture making it a weekend leisure destination. Gyeonggi Bay offering abundant sea angling has become the hub for the best boating location with Jebu Marina adding another 300 berths to provide the largest and best equipped combined facilities in Korea.

**1. Jeongok Marina(Hwaseong)**  
Moorings for 200 yachts (completed in 2011)  
Main facilities: Marina and supporting facilities, pleasure boat pier, marine park, aquatic leisure facilities.

**2. Jebu Marina(Hwaseong)**  
Moorings for 300 yachts (To be completed in 2020)  
Main facilities: Marina and supporting facilities, indoor/outdoor marine recreation center, marine zoo and botanical garden, observation deck.

**3. Ansan Marina(Ansan)**  
Moorings for 300 yachts (To be completed in 2021)  
Main facilities: Marina and supporting facilities, accommodations, auto camping site, oceanic swimming pool, fishing site.

**4. Ara Marina(Gimpo)**  
Moorings for 192 yachts(completed in 2012)  
Main facilities: Marina and supporting facilities, petrol station pleasure boat pier, accommodations, premium outlet.

### Korea International Boat Show and Korea Fishing Show 2020

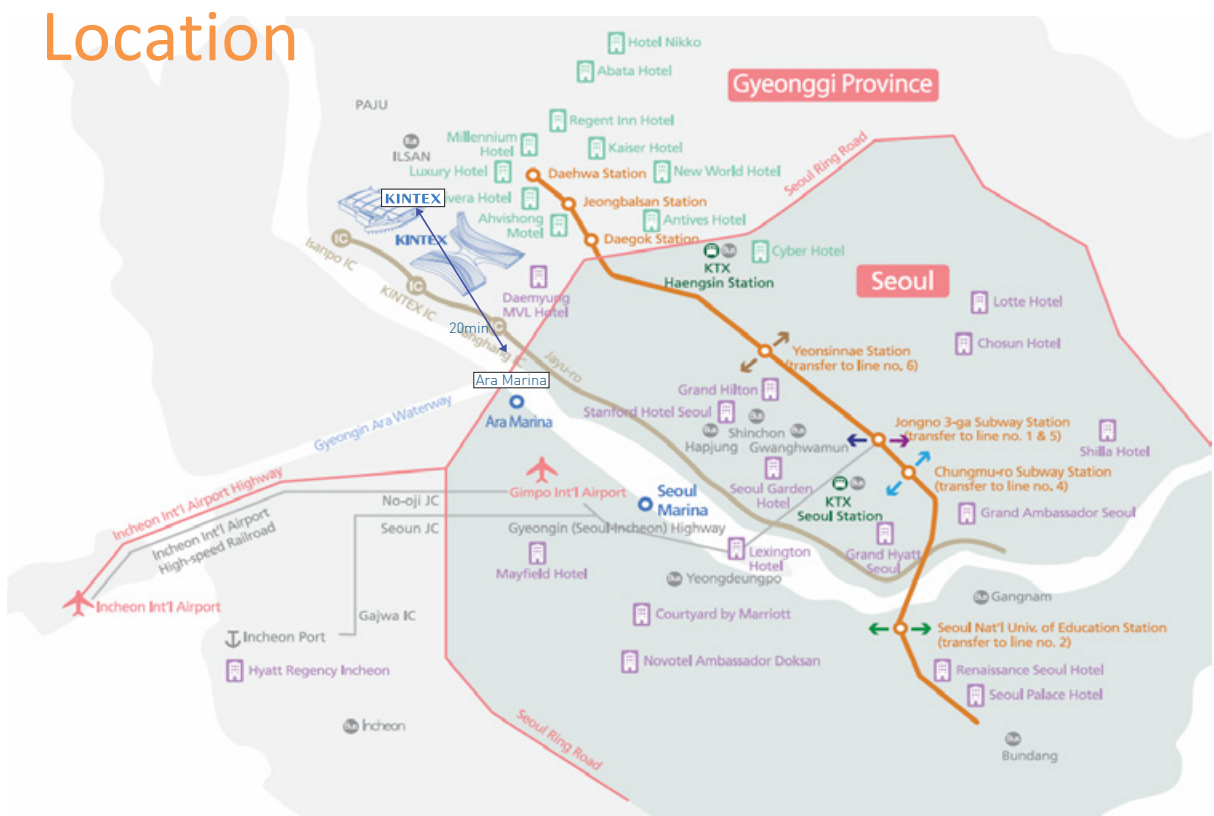

The 2019 editions of the Fishing and the Boat Show attracted a total of 100,000 public visitors. The Show Organisation for the combined 2020 Boating and Leisure Fishing event are confident and excited that the Show date in March will generate increased pre season interest, encourage more visitors with the wider show offering and bring together closely connected marine leisure activities with significant benefits to develop the marketfor both sectors.

Venue

KINTEX (Korea International Exhibition Centre). Halls 3-4-5, Ara Marina (On Water Show)  
Gyeonggi Province (Greater Seoul), Korea.

\*Korea Fishing Show 2020 : KINTEX Halls 1-2

KIBS International partners

KIBS has a long standing tradition established at our first event in 2008 of working in partnership through MOU's with the Industries leading National Boating and Boat Show Organisations for the mutual benefit of our combined interests to increase Nation to Nation business, maintain the highest standards and to create lasting friendships.

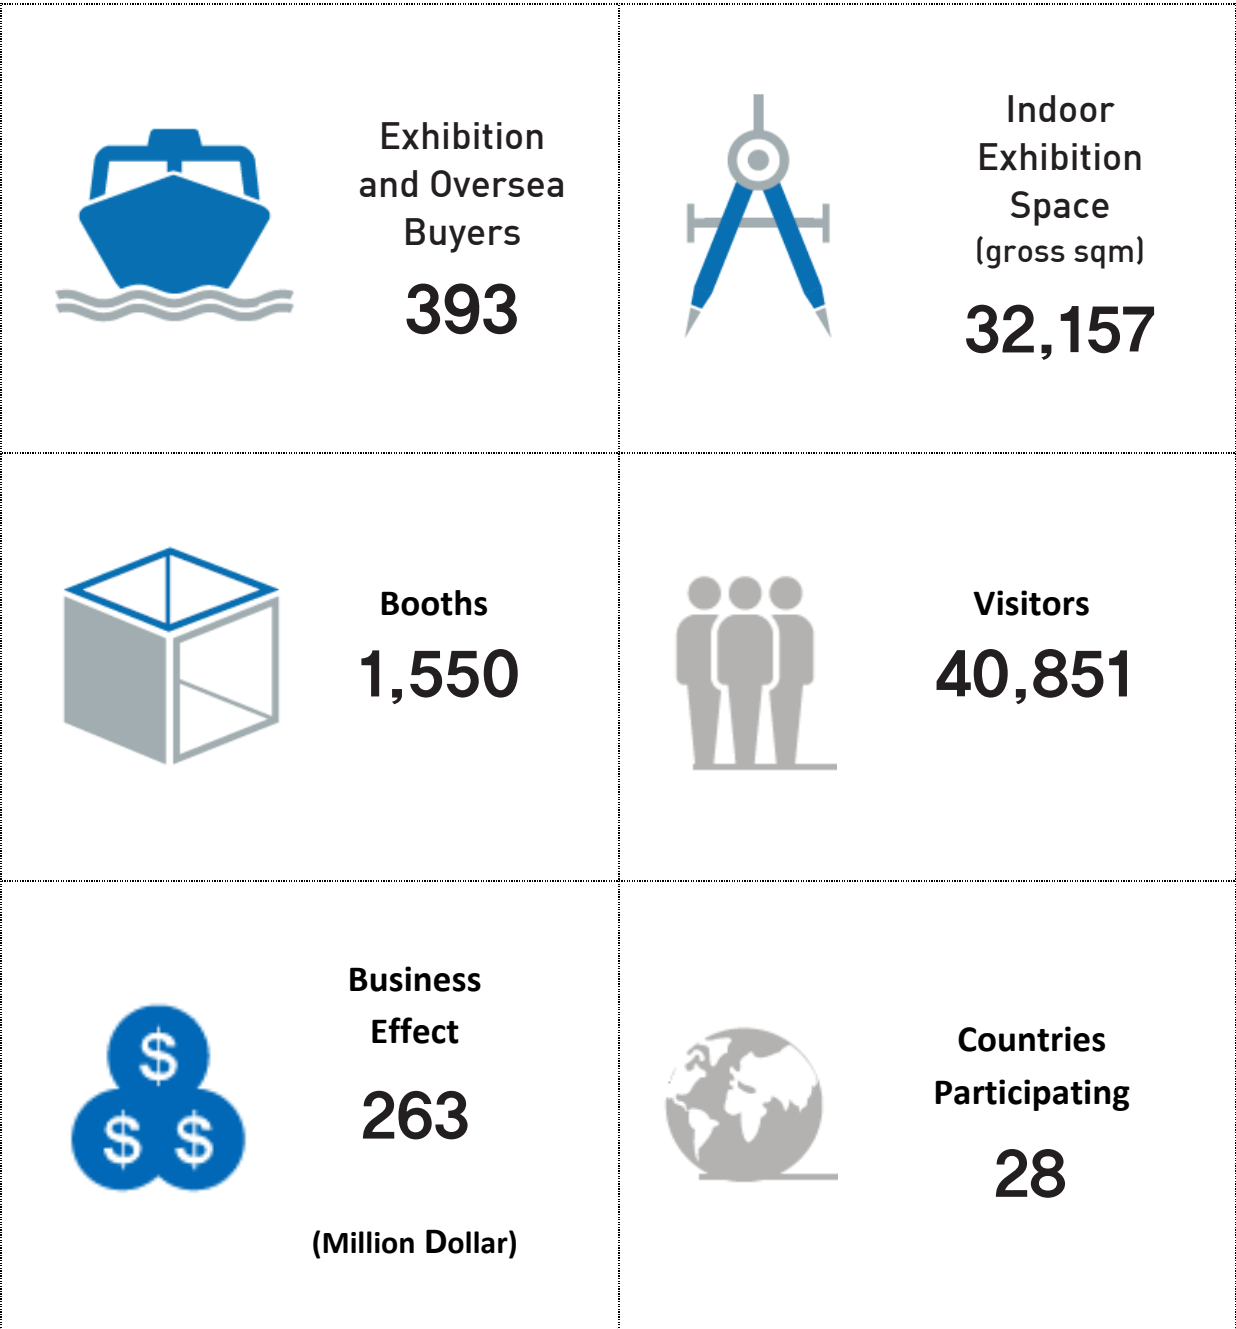

Mike Derrett  
IBI Asia Correspondent 2019  
www.ibinews.com

“The overall reduction in tension between North and South Korea over recent years has meant that most of the coastline in the South is now available and being used for boating. Rules and regulations for the use of a leisure boat are also very transparent, which has given a green light for the rapid development of boating. There is strong potential for small and medium-sized boats with associated equipment and services, likely to pick up fast given better economic news. Government plans to provide further support for a network of marinas which have been in place for 10 years is a key driver for the future growth of the industry”

The KIBS Gallery featuring KIBS 2019

In just 12 editions KIBS has grown to become one of the 3 leading boat shows in Asia alongside Dubai and China. At KIBS we do business – 40,851 visitors – 1,550 booths from 28 countries.

Directory of Korea's Major Marine Companies

Corporation			Products		
	PRETECH MARINE  Tel : +82-31-763-8178 www.pretechco.com	Pretech Marine has been the leading manufacturer and supplier of Steering Systems, Control Cables, Control Levers and Accessories for over 25 years. Currently, there are over 40 global distributors supplying Pretech Marine's product in every corner of the world. Pretech Marine is exhibiting Rotary Steering System, Engine Cable, Control Lever, Bluetooth Wireless Marine Speaker at the boat show.		ROTARY STEERING SYSTEM IS COMPOSED OF ROTARY HELM AND STEERING CABLE. BOATER CAN CONTROL THE BOAT BY TWIRLING THE ROTARY HELM.	
				AUCEAN IS THE FIRST HIGH-QUALITY, INTEGRATED LED LIGHT AND MARINE SPEAKER SYSTEM, AND IT FEATURES BLUETOOTH CONNECTIVITY TO MAXIMIZE YOUR ONBOARD EXPERIENCE.	
	Hyundai SeasAll  Tel : +82-70-8620-8032 www.hyundai-seasall.com	New Thinking, New Possibilities. We start with the venture company of Hyundai-Kia Motors in 2007, and established the independent corporation, Hyundai SeasAll in 2009. With the world's 4th largest automobile producer(Hyundai-Kia Motors) behind us, we have access to one of the best engineering terms on the planet. We benefit from their expertise and our base engines are a results of their work. We develop 5 base inboard diesel engines in 24 different versions from 125 horsepower to 500 horsepower. We are always committed to expanding our global network to serve the varied needs of customers worldwide. Considering our solid business foundation and already exponential growth, we fully expect to become one of the world's leading marine engine manufacturers in the near future.	H380 - 380PS(280kW) ~ 10 Liter In-Line 6 cylinder Engine	We have added marine expertise to automobile engines built by Hyundai which has long been viewed as the world's leader in high-quality engine manufacturing. Because Hyundai's original design technology has already been proven in the automobile industry, we can confidently venture out to all seas around the world.	
					
	Baeksan Propeller Co.,Ltd.  Tel : +82-51-311-4167 www.bspp.co.kr	BaekSan Propeller Co., Ltd. does the constant R&D activity and keeps investing in the equipment to provide the customers with the better quality aluminum propellers. We provide our customers with good service and share the technical information. We have our goal oriented to what our customers want.		BS.PRO propellers which are well designed based on fluid dynamics and by CAD/CAM are the replacement propellers for the genuine propellers. In order to endure the tough conditions under sea and fresh water, we developed special aluminum alloy, and we acquired some patents on the materials and the casting techniques. We use investment casting to realize the finer grains inside the materials.	
					
	D-I INDUSTRIAL Co., Ltd.  Tel : +82-55-760-5520 www.d-i.co.kr	D-I INDUSTRIAL Co., Ltd. is the leading manufacturer of marine transmission, marine steering system and power take-off in South Korea. South Korea has the long coastline, thousands of islands and ten thousands of vessels. This geographic condition becomes the nutrient on which Korean maritime industry has been developed to the extent of world-level industry in the viewpoint of technology and scale. In this environment, D-I launched its entity by manufacturing hydraulic marine transmission having the motto of BETTER AND BETTER PRODUCTS FOR THE FULL SATISFACTION OF CUSTOMERS IN ANY SEA.  What we had thought and practiced for last decade is how to realize our motto. As a result, D-I is receiving the reputation from Korean customers as the most reliable company in the market of marine transmission and steering system, and thanks to and based on this reputation, D-I has grown to the biggest manufacturer and supplier in domestic market. In case of marine transmission, Korean major manufacturers of marine engine such as INFRA CORE (former DAEWOO Heavy Industries, Ltd.), and HYUNDAI Marine Co.'s are selecting D-I marine transmission for their engines. And the local authorized distributors of major marine engine like Cummins, Volvo Penta, Caterpillar, Scania and John Deere are also selecting D-I marine transmission as the best option of marine transmission for their engines. D-I has been enlarging its scale up to worldwide level and supplying its products to more than 50 Countries. D-I will keep continually its motto toward the customers with unceasing self-renovation and challenge. D-I deeply hopes it could be the best supporter and friend to the people who love SEA and Vessels in every where.	Marine Transmission		
			Steering Systeme		
	VINSSEN  Tel : +82-61-462-7004 www.vinsсен.com	VINSSEN Co.,Ltd. was founded in 2017, VINSSEN is developing technology development and infrastructure for maintaining exclusive competitiveness on the target market with the high quality interior of the super yacht market. Through our interior shop management, we collaborate with overseas famous design teams and have the process and technology to implement at the site from design to finished goods.  Currently, we are in the process of designing and manufacturing the interior of the 130FT super yacht cabin under construction in the country, and by accepting orders such as interior turns for yacht installation chairperson, multipurpose fishery instruction ship etc. I am doing it.  In the domestic market, there are no companies with advanced yacht interior results, and I think that if we carry out our domestic and overseas achievements through ongoing publicity at the present moment, I think that we can anticipate a position that is independent.		Boat and Yacht Interior Design and Outfitting Work

	<p>Tel : +82-2-511-2244 www.ionslab.co.kr</p>	IONSLAB CO., LTD. is emerging as technological leader in the metal-air fuel cell industry & new and renewal energy system. We are sure that our new innovative technology will contribute the growth of boat industry and we will also suggest you a new alternative for many environmental problems rising in the future.	CELLION-10	CELLION-10 AS a metal-air battery is a new and innovative battery featuring an air-electrode that breathes oxygen from ambient air and that is to oxidize the metal magnesium fuel containing in an electrolyte and resulting in producing ENERGY. By replacing the metal plates with electrolyte(seawater) enables a metal-air battery to re-produce energy constantly.	
	<p>Tel : +82-51-831-6880 www.dtec.co.kr</p>	DTEC provide the top quality of craftsmanship in aluminum boatbuilding and also have boat design experience in many years. Furthermore, in order to discover future business opportunities, we are cooperating with SEALEGS NEW ZEALAND that is famous of amphibious boat.		Center Console Fishing Boat	
	<p>Tel : +82-52-223-0591 www.scotra.co.kr</p>	SCOTRA CO., LTD. established in 2007 has developed new-type water floating system and manufactured it. SCOTRA CO., LTD. producing everything on the water such as marina, pontoon bridge and special purpose pontoons will exhibit various floating system multiroom float, general float.	Multi-room float	Multi-room float which is composed of 9 isolated rooms to maintain superior stability and durability and is equipped with non-slip pad to secure safety of pedestrian.	
<p>Scotra Co., Ltd.</p>			General float	General float General float features easy installation, reasonable price, convenient maintenance, superior coherence and non-slip pad.	
	<p>Tel : +82-55-338-1640 www.seafirst.co.kr</p>	SEAFIRST ENGINEERING COMPANY has been designing, manufacturing and supplying hydraulic steering systems to the world since 2003. Our experience, know-how, and expertise in developing a new technology have made SEAFIRST the leader and the foremost company in Korea, who has market share 90% (Outboard hydraulic steering) in Korea. To provide customers worldwide with the finest hydraulic steering equipment available, our company is dedicated in our endless effort to develop products that will become the mainstay of marine steering systems.		Hydraulic Steering for outboard Hydraulic Steering for Stern drive Hydraulic Steering for inboard	
	<p>Tel : 82-10-2647-6992 www.roboats.kr</p>	The Roboats Animation was exhibited and promoted in 2016 at the Frace-Anncey Animation Festival and Mipcom, and is being supported by the Korean Culture Contents Agency from 2017 and Yeongdeok-gun in Gyeongsangbuk-do, and is being co-produced with BEEPROD in France from 2018. It is scheduled to be broadcast in France in 2019, and is being discussed in Korea. The company is carrying out various boat-related projects including the Roboats Experience Center in Yeongdeok-gun, Gyeongsangbuk-do. The Roboats Research Center is located in Seoul Partners House, Hannam-dong, Seoul.		It is necessary to develop a new educational paradigm and education contents due to the 4th industrial revolution, and the importance of second foreign language education is becoming more important for the globalization. In addition, it is in co-development with CANOPE, a French educational institution, to enable self-directed learning through our education projet (called kids' cafe) and games and platforms that take mobility into consideration, such as mobile and tablet, in terms of foreign language education for young children	
	<p>Tel : +82-51-315-5487 www.daehwa.biz</p>	Based on technology which has had steadily and creative spirit as the leader in DC motor pump industry for the past 20 years, DAEHWA ELECTRIC CO., LTD., is leading the domestic pump industry and is moving forward step to become the center of the world's pump industry in the future. Our goal is to have the technological competitiveness through constant research and development. Futhermore, we will be a company recognized as technology and quality through continuous cretive spirit. Currently, we are manufacturing a wide range of products such as submersible water pump, fuel and oil transferring pump, air pumps. We will continue to be not complacent and will do our best to deliver a variety of high quality and high efficiency products through constant research and experiment.	Fuel transferring pump	Fuel transferring pump : This pump has a self-priming for transferring liquid such as diesel and petroleum.	
<p>DAEHWA ELECTRIC CO., LTD.</p>			Oil transferring pump	Oil transferring pump 1)This pump uses vane impeller or flexible impeller available for self-priming. 2)It is suitable for transferring highly viscous fluid such as engine oil.	
	<p>Tel : +82-31-447-7977 www.nextfloat.net</p>	NEXT CO., LTD is leading best modular pontoon manufacturing company in Korea. With NEXT FLOAT, it can be used to construct floating bridge, dock, marina, platform, stage and any other water related floating structures. NEXT CO., LTD is not only just manufacturing NEXT FLOAT, but we also offer total marina projects from designing, constructing, and even follow-up consulting.		NEXT Float can be able to extend both vertically and horizontally in any size and shape. It has more than buoyancy of 90kg per each piece, and able to hold more than 2 Tons of tensile weight per each connecting hooks. NEXT Float has been certified its well-made durability and performance over the year.	
	<p>Tel : +82-55-832-0633 www.daedongmarine.co.kr</p>	DMT engines are developed and produced by Hyundai Motor Co. and Daedong Marine Tech. Daedong supply diesel engine and generator for land and sea to all industrial sections (small boat, leisure boat and boat of public office). DMT diesel engines are wellmatched engine to the period of " Low Carbon Green Growth" and environment-freindly. Daedong has development department and cooperated with national university to develop new products. And Daedong is doing positive invest and interest to supply high quality products to domestic and international markets. Especially one item is patenting at now. DMT engines are suitable for high oil price periods. Daedong will devote continuously for the highest customer satisfaction.	DD6CC 1500 550PS2000RPMJ		
<p>DAEDONGMARINE TECH</p>					
	<p>Tel : +82-43-452-4116 www.carinaboat.com</p>	Based on abundant experiences of manufacturing and know-how related to business of boat manufacturing, we especially manufacture in tailor-made forms of our main production items of combination (RIB) boats, rubber boats, leisure sport boats and supplies as 100% domestic production company in field of maritime leisure business.		We display a COMBIBOAT (RIB650/RIB550 and RIB620/RIB530/RIB480) on the 2015 Gyeonggi International Boat Show developed by domestic public law. We can expect the enjoyment and relaxation with new product combine the design, stability, ease and efficiency.

	<p>Tel : +82-33-534-0581 www.hn-marine.com</p>	Hannam Total Marine has lots experiences and technical skills of the Fun-Boat production for 30 years since 1983, and continuously developpe the new boats and cost saving productions. We have the only patented Technology for the clear boat & canoe in Korea, and efforts on the of the applying Environment-friendly new materials. Nowaday, we plans to make bigger size Fun-Boats in the future. In forth, we will design and will make new Fun-Boats for peoples joy and will search for new safe materials to prepare 21 century. Thanks. Lee Jun Gu, president.		Normal canoes and boats are made by FPR or polyethylene which has semitransparency and are used for ocean tour. But, the tourist feels boredomness during the canoeing. So, we made the clear canoes and boats to solve this problem. The clear canoe is not made by FRP or polyethylene which is used for normal canoes and boats, but is made by transparent material, polycarbonate. Therefore, you can see underwater world through the whole hull body. The clear boats and canoes are excellent and rare products in the world, because you can enjoy the ocean and the underwater tour at once. Also, the FRP canoe is made by laminating method and the polyethylene canoe is made by rotary forming method. But, the clear canoe is made by vacuum forming method. This method overcomes the demerits of FRP laminating or rotary forming method. FRP laminating method is not suitable for mass production process and rotary forming method needs high priced mold. Our company uses low priced FRP mold and vacuum forming machine to build mass production system for the clear canoes and boats. Therefore, our company increases product and price competitiveness in overseas canoes and boats markets.	
	<p>Tel : +82-070-7542-7430-3 www.tornd.com</p>	T-O R&D Labs. is the first sports equipment, Marine equipment a specialized design firm in Korea. Our many experiences are able to do especial safe sports equipment, planning, design consulting & Pilot model making service area. We do also have own brand(Black-T) and do focus on marine leisure equipments design for populace.	Marine-B	Marine-B is user sensitivity-oriented marine sports equipment, whose neoprene cover is eco-friendly and harmless to humans. In addition, it is convenient to carry, keep, and wash. Also, inside core and skins can easily be replaced according to the user's taste. Depending on the user's choice, it can be used as a simple water ride in the swimming pool or in the river.
